

# Foundational Documents

Phase 1 Foundational Documents efficiently organize and share a large volume of information (such as insights from institutional investigative files, site visits, and witness statements) collected in the Commission's independent investigation into what happened during the April 2020 mass casualty. Below are the steps we are following to create the Commission's Phase 1 Foundational Documents. Currently, we are reviewing the draft Foundational Documents with Participants to ensure they are as accurate as possible.
